# Bona R820™

Bona R820™ is a one-component, silane-based wood flooring adhesive that offers adhesion to a variety of surfaces. The initial bonding strength and ridge stability makes it particularly suitable for engineered flooring installations with low movement. The adhesive offers a long open time of up to 90 minutes and allows for easy trowel application. GREENGUARD Certified for indoor air quality.

## Key Features and Benefits

- Easy to spread
- Long open time of up to 90 minutes
- Economical profile for competitively installed engineered flooring
- GREENGUARD Certified
